

## Experiments -2

### Design of Logo using GIMP.

Step – 1: Open GIMP, go to file->new file-> choose 1080x1080 size screen with white as background.

Step – 2: Open GIMP, and go to file->Open As Layers-> And open the picture/drawing as a layer.

Step – 3: Now choose free select tool from toolbar, and start selecting the border/boundaries of the picture.

Step – 4: After selecting all the boundaries, connect the last point with the first one and cut that portion from that image using CTRL+X.

Step – 5: Paste this image on the white background layer from the Layers column.

Step – 6: Select Paintbrush tool from the toolbar and a colour from colour palette,

Step – 7: Start drawing the boundaries of the letter with steady hand, so that you could get a layer like this.

Step – 8: Now select the Bucket fill tool from toolbar and modify its setting according to your creativity.

Step – 9: Repeat Step 2 and add another image.

Step – 10: To add Text to your image select Text Tool from toolbar.

Step – 11: Save the output and export it as jpg.
