

Experiment – 3

Design of Google Logo using GIMP.

Step - 1:

Open GIMP, go to file->new file-> choose 1080x1080 size screen with white as background.

Step - 2:

Go to image-> Guides->Guides by %-> Choose 50% horizontal guide and in similar way 50% vertical guide. Step - 3: Now choose the ellipse tool from the select toolbar, and start drawing a circle in one of the quadrants of your choice. Press Ctrl+Shift to position it at the center.

Step - 4:

Go to select-> None.

Step - 5:

Go to path->Make the selection visible-> Now, add it to the text.

Step - 6:

Right-click on the text layer, choose text along path-> go to path and add a new layer with it.

Step - 7:

Go to path, text1-> Transparent, fill the path->solid colour-> delete text1 path.

Step - 8:

Now text-2, click to toolbar-> Flip tool-> Transform row-> Direction Flipping.

Step - 9:

Now go to the text layer-> right-click on text-2-> Click on text along path-> Adjust the position of 2nd text by the rotate tool.

Step - 10:

Add a new layer from the 2nd text, select that layer->Go to the path-> Right-click on it, select text along the path. Fill the path with a solid color.

Step - 11:

Go to File and open the google logo as a layer and place it in the center and make other layers invisible.

Step - 12:

Save the output. And export it in another location with (.xcf) extension.
